

Production Modernization of the Components of Mechanical Transmissions to Manufacture Agricultural Harvesting and Forage Harvesting Machinery

A. Project opportunity description

A1. Project name:

Production modernization of the components of mechanical transmissions to manufacture agricultural harvesting and forage harvesting machinery

A1a. Short name:

Production modernization of RUE "Gomselmas"

A1b. Full name:

Production modernization of the components of mechanical transmissions to manufacture agricultural harvesting and forage harvesting machinery

A1c. Summary description:

The project is a group of measures to modernize the production capacity of RUE "Gomselmash" during 5 years beginning with 2011 to 2015 inclusive. In the result of the investment project realization technical re-equipment of mechanical processing production with the replacement of physically deteriorated and obsolete equipment by new highly efficient equipment with semiautomatic cycle, program control, equipped with power tool, checking and tracking systems will be carried out. That will enable to make the flexible production capacity and expand the range of produced machines, quickly react on customers' needs, provides with constant increase of production volume on the enterprise.

A2. Project status:

The business plan is on the stage of development, the term is according the time schedule – April of 2011. The project is in the stage of realization, the market researches on the field of machine building industry are held, tasks on the equipment purchase are developed, competitions are announced.

A3. Organization involved and their roles:

RUE "Gomselmash" is the project organizer, 246004, Gomel, 41 Shosseynay str., Fax: 54-91-93, teletype: 110115 "Almaz",

E-mail: gomselmash@tut.by, gomselmash@mail.ru

<http://www.gomselmash.by>;

Chief Engineer is Psyrkov Nikolay Vladimirovich, tel.: 59-22-30.

A4. Project description:

Technical re-equipment of mechanical processing production, making of "flexible" production capacities, cost reduction on the product manufacture. The equipment purchase during 2011-2015 is offered, 148 units of technical equipment. In the structure of buying equipment – as the equipment of Belarusian production than from the near and foreign countries.

(The suppliers are chosen on the competition results.)

A4a. Project cost:

66,6 million \$.
